

## INVITATION

### META-RESEARCH AND THE QUEST FOR BETTER SCIENCE

KEYNOTE GIVEN BY DR. JOHN IOANNIDIS

*Professor of Medicine at the Stanford Prevention Research Center and professor of Epidemiology and Population Health at the Stanford University School of Medicine*

**November 10, at 12:30 pm - 13:30 pm  
at École Polytechnique**

*Registration is free but necessary. Please click on the invitation to register*

Hi! PARIS Interdisciplinary Center and the Computer Science Laboratory of École Polytechnique are honored to invite you to an **exceptional lecture given by Dr. John Ioannidis on Wednesday, November 10 12:30pm-13:30pm at École Polytechnique.**

An inspiring personality, John Ioannidis is professor of epidemiology and population health at Stanford University School of Medicine. Standing among the 10 most cited scientists in the world, his work focuses on the reproducibility of scientific studies with a famous article he published in 2005 *"Why Most Published Research Findings Are False"*, which opened the debate on this topic. His lecture will navigate the landscape of research practice improvements across diverse disciplines in the current landscape (with special circumstances, e.g. the recent COVID-19 pandemic).
