REGISTER NOW

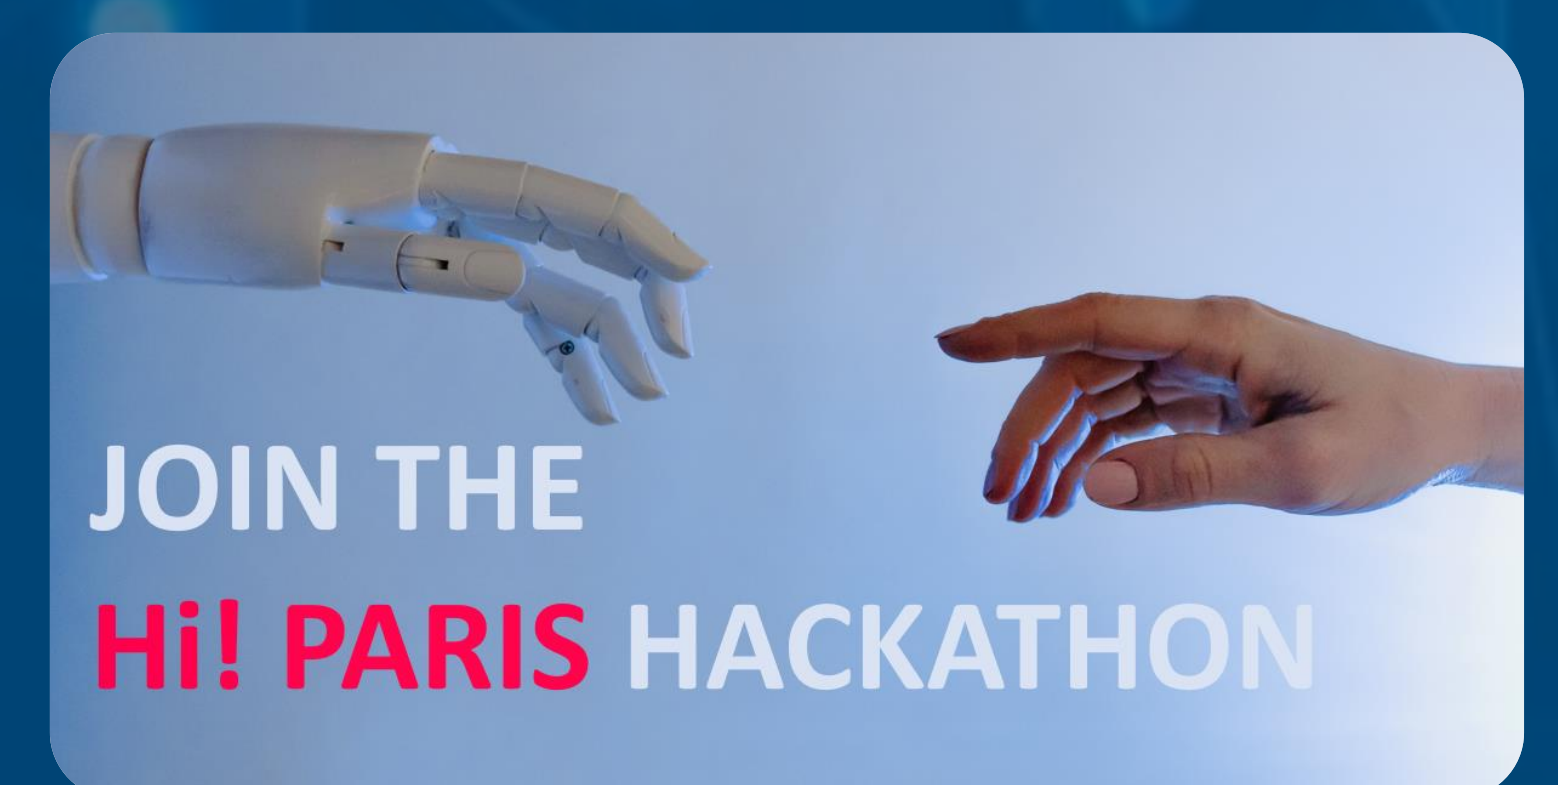

Dear future participants!

It is with great pleasure that **Hi! PARIS** announces the opening of registrations for the 2nd edition of the **Hi!ckathon** which will take place from March 4th to the 6th, 2022.

What is the Hi!ckathon?

The **Hi!ckathon** is the data/AI event for all IP Paris and HEC students, allowing them to work on complex issues with high business stakes, organized by **Hi! PARIS** - the interdisciplinary research center in Data/AI with a worldwide vocation. You can visit the website [HERE](#) !

The **Hi!ckathon** is for you if you are motivated, have minimum skills in AI programming with Python and appetite for AI & its concrete applications in the business world.

Did you say challenging?

This year, the **Hi!ckathon** is reinventing itself with a major challenge that will give you the occasion to think as a team about a key issue for our future : **AI & Sustainability**.

Interdisciplinarity will be a must for this **Hi!ckathon**, as you will be asked to realistically project yourself in a market context, while having to handle cutting-edge AI technologies.

Therefore, you will have the opportunity to form teams with your classmates from all over IP Paris, HEC and from a few other institutions and universities.

Finally, you will benefit from 15 hours of training during 5 weeks before the **Hi!ckathon** at a rate of 3 hours per week.

You will also have the possibility to interact with the corporate donors, during this period, through different types of animations that will take place both face-to-face, thanks to Télécom Paris, Palaiseau which will welcome you in its premises, and remotely (respecting the imposed sanitary instructions).

SCHEDULE

February 1 st to 4 th	<p>Feb. 1 at 6.00PM: Kick off Preparation Register on Zoom HERE</p> <p>Feb. 1 at 7.00PM: Python for image processing (2-3h)</p> <p>Feb. 2 at 6.00PM: Corporate donor presentation Register on Zoom HERE</p> <p>Feb. 3 at 6.00PM: Q&A session Register on Zoom HERE</p>
